

IN THE CLAIMS

Please amend the Claims as follows:

1. (original) A formulation for the administration of a medicinal substance as used in compliance with a drug treatment dosage regime comprising a sandwich biscuit comprising two or more biscuit layers that support layers wherein the cream filling layer comprises a dosage unit form or multiple or sub-multiple thereof of an unpalatable medicament.
2. (currently amended) A formulation according to claim 1, ~~in which~~ wherein the medicament has a gritty texture or a chalky texture or other unpleasant mouth feel.
3. (currently amended) A formulation according to claim 1 ~~or 2, in which~~ wherein the medicament is present in an amount of greater than 500 mg per biscuit.
4. (currently amended) A formulation according to claim 3, ~~in which~~ wherein the medicament is present in an amount of between 1 g and 3g per biscuit
5. (currently amended) A formulation according to ~~any of the foregoing claims, claim 1 in~~ which wherein the medicinal substance is selected from the ion exchange resin substance VML252, optionally in combination of calcium carbonate, the ion exchange resin cholestyramine, optionally in combination chlofibrate, gemfibrozil and other orally active cholesterol-lowering materials, anthelmintic agents, metformin or gamma guanidinobutyramide and its pharmaceutically acceptable salts, optionally in combination of other oral agents used to treat diabetes type 2, optionally in combination with other agents for the oral treatment of obesity, and ion exchange resin suitable for treating elevated serum potassium, optionally in

combination of with other oral agents used for treating elevated serum potassium.

6. (currently amended) A formulation according to claim 5, ~~in which~~ wherein the anthelmintic agent is selected from the group consisting of albendazole, febendazole, Ivermectin, thiabendazole and another bendazole substances.

7. (currently amended) A formulation according to ~~any of the foregoing claims comprising a claim 1 wherein the~~ biscuit layers comprise a medical substance, ~~in which~~ wherein the medicinal substance in the biscuit and the medicament in the cream filling layer have a co-operating or synergistic effect on administration.

8. (currently amended) A formulation according to ~~any of claims 1 to 6, claim 1 in which~~ wherein the biscuit layer is an oatmeal biscuit and the medicament is a cholesterol lowering pharmaceutical.

9. (canceled)
